

A woman with short dark hair, wearing a yellow tank top and a light blue cardigan, is sitting on a white wicker lounge chair on a modern patio. She is holding a yellow garden hose. The patio is surrounded by various potted plants, including a large potted plant to her left and a smaller one to her right. In the foreground, a yellow and black Claber hose reel is visible on a green lawn. The background shows a modern building with large windows and a balcony. The overall scene is bright and sunny, with a green overlay on the right side of the image.

GARDENLIFE  
2023

## A FUTURE YET TO BE WRITTEN, NOW

We have long regarded nature as an inexhaustible source of elements, energy and beauty, averting our gaze from the fragile balance that has been lost. Climate change is no longer a matter of warning signs but is made up of hard evidence: a window on the future.

Another window offers a different perspective: onto the world that could be, and will be, if we will go on in giving voice to environmental concerns, to a culture of compassion and respect for nature.

A big change made up of small actions and practices that don't need much effort, just a sense of responsibility. Now, more than ever, Claber is constantly driven by its commitment: projects, investments and attention to every little detail to manage the transition into an industry that is not just ecologically sustainable but is also serving the environment. This is the window through which we are looking at the future.

# THE NEW WELLNESS IS CALLED HOME

GREEN THINKING  
New Trends

How the ways of living change nowadays when the home becomes the centre of our lives.

THE BEAUTY  
OF FUNCTIONALITY

01

## THE ROLE OF DESIGN

Technology is simplifying life, beauty is adding harmony to our souls. Design, which perfectly combines aesthetics and function, is the key that opens up a new way of living and it will increasingly take centre stage in our homes.

GREEN SPACES  
TO ENJOY

02

## RETHINK GREEN SPACES

At last it is time to rediscover the pleasure of sharing our spaces with friends again.

The ideal place for evenings with friends?

A well-organised garden, with pieces of furniture that perfectly complement each other, lighting designs and, above all, a growing, luxuriant lawn.

**Underground watering is an easy solution and tailored to modern gardens with Hydro-4 (page 140)**

03

## ETHICAL PLEASURE

Reducing the impact on the environment and limit the water consumption will become increasingly important, starting from our homes, making them more comfortable and full of plants.

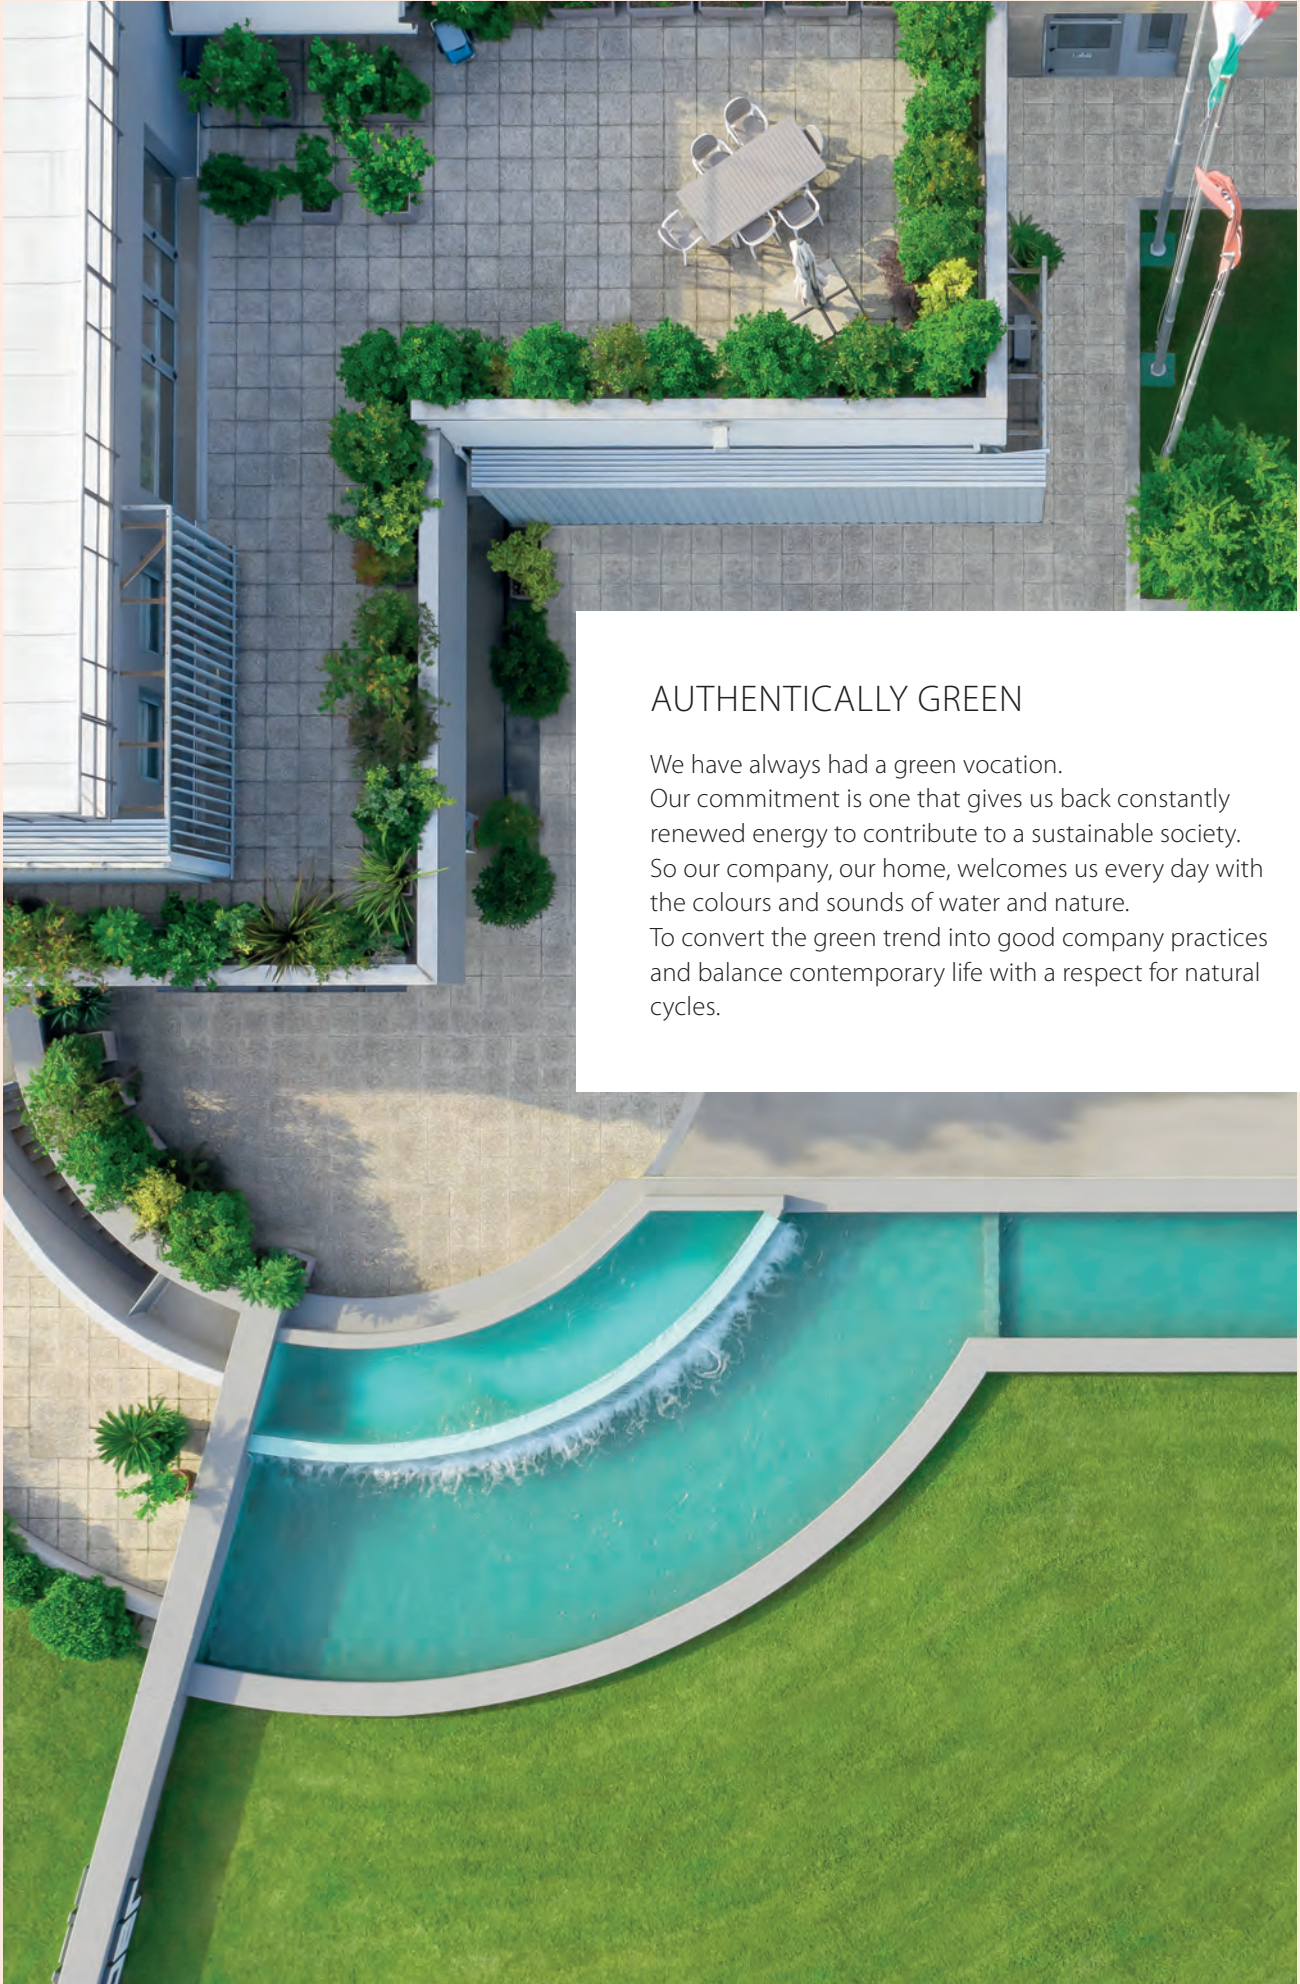

Watering correctly and wisely combines the pleasure to the respect for the environment.

For an ethical irrigation that works particularly well in case of drought, choose **Claber Drip kits** (page 116)

PLANTS THE LEADERS OF THE NEW  
LIVIGN CONCEPT

## AUTHENTICALLY GREEN

We have always had a green vocation. Our commitment is one that gives us back constantly renewed energy to contribute to a sustainable society. So our company, our home, welcomes us every day with the colours and sounds of water and nature. To convert the green trend into good company practices and balance contemporary life with a respect for natural cycles.

# CLABER'S SUSTAINABLE PLACES

## THE WATER ACADEMY

Making a company, culture and nature. Amidst the green waters of a river that passes through the Friulian countryside we discovered a disused hydroelectric station. We brought it back to its full glory and today it generates clean energy and adds value to the area. The Water Academy means a thousand things to us, but the first is that we are able to use nature responsibly, giving and receiving without exploiting. It's somewhere for company activities to take place, reminding us of the importance of working with integrity and awareness. And also a place for cultural experiences, for teaching, welcoming and including. The power station produces energy, regulates the flow of water and follows nature's lead in a context of harmony and balance.

## GOOD PRACTICES

Our whole history is our commitment to creating a business that is environmentally aware.

An idea that runs through every phase of our work and is translated into concrete actions and results. We have greatly reduced the company's basic requirements and energy consumption through advanced production systems, LED lighting, the installation of photovoltaic panels and water recovery systems.

We pay great attention to the quality of raw materials and are pioneers in the use of eco-sustainable, fully recyclable materials, such as FSC cardboard packaging and 100% recyclable PET shells.

And even before this, we work on education and popularising a culture of respect for nature and people.

Those who work with Claber fully embrace the conviction that everyone can contribute, every day, with small and large steps, to improve the environment, their own life and that of other people.

The future is ever greener with Claber.

# BEAUTIFUL, SMART, VERY GREEN: THIS IS THE NEW CLABER PACKAGING

Claber has fully embraced the values of the circular economy, by setting some ambitious targets and by putting in practise some structured actions, such as the big innovations in its packaging.

Starting with the new display stands in FSC cardboard and 70% recycled materials that are environmentally

friendly, beautiful to look at and designed to make it even easier to find the ideal product while also offering the best compatibility with other Claber items.

The evolution continues with the new packaging where plastic is replaced by environmentally friendly materials and some smart, creative solutions.

To make customer's life easier, there are new dispensers for loose products and the labels will show new, bright, even clearer graphics.

Once again Claber is confirming that it can stand out, that it respects nature and cares about people.

FSC CARDBOARD  
AND 70% RECYCLED  
MATERIALS, BECAUSE  
WE LOVE NATURE.

CLEARER AND MORE  
EFFECTIVE INFORMATION.

Bright and distinctive,  
clear to follow, made  
of eco-friendly materials:  
Get ready for the new  
Claber packaging!

A woman with curly hair, wearing a light green button-down shirt, is watering a garden. She is holding a hose that sprays water, creating a misty effect. In the foreground, a large white flower with many small petals is in focus. The background shows green foliage and a clear blue sky.

## ABOVE-GROUND IRRIGATION

### WATERING IS A REAL PLEASURE

Everyone can find the right solution for their needs with Claber's extensive above-ground irrigation range.

The pistols and spray nozzles not only have a cutting-edge design, but they are also efficient and comfortable to hold, made of materials that guarantee perfect grip.

The sprinklers are lightweight yet sturdy, designed to last over time and handy to adjust.

This makes them perfect for any garden or green space. Our hoses are made of first choice materials and can be used with our extensive range of hose reels, helping you move freely around your garden.

Our automatic couplings, easy-to-install in a quick click, meet all the most common connection needs, ensuring no water waste.

Claber products not only look great, but are also handy and easy to use, making watering a relaxing and enjoyable experience.

Give value to the time you  
spend in the garden

Choose technology, without  
compromising on style

#### A MATTER OF STYLE

Convenience, the choice of different jet patterns, quality materials and a unique design: the wide range of spray nozzles and pistols perfectly represents Claber unmistakable Made in Italy style.

#### CONNECTING UP

Much more than just simple connectors and couplings. In addition to being the most comprehensive and universal range of products, Claber range stands out for the work that has been done on such a small yet vitally important accessory, for perfect irrigation with no wasted water.

#### WHEN EVERYTHING TURNS OUT RIGHT

Practical, lightweight and sturdy, Claber hose reels and carts have one sole purpose: making your life in the garden easier every day.

#### AN AQUATIC DELIGHT

Static, rotating, oscillating and pulsating sprinklers guarantee perfectly calibrated and even irrigation across the lawn, creating pleasant water patterns with a light rain effect.

## A PRECIOUS MOMENT

Watering your flowers, lawn or vegetable patch first thing in the morning, or as the sun goes down in the evening. The smell of wet grass. Droplets of water sliding off the leaves, forming little streams on the ground. These are invaluable everyday moments that Claber helps you treasure with its range of products.
