

SPRAYERS

Practical, multi-purpose and easy to manoeuvre: Claber's new pressure sprayers are ideal for potted plants and small green spaces in your garden. With a 1,5 or 2 litres capacity, a firm grip and an adjustable jet span, they can be used to distribute water, fertilisers or anti-parasite liquids with precision. Claber sprayers are designed to work at any angle and a practical see-through marker allows you to monitor the liquid level at all times.

They're long-lasting and comfy to use, also thanks to the high-quality components like the Viton® seals.

SPRAYER 1,5 L

8080

1.5-litre pressure sprayer. Compatible with water and other solutions such as detergents, fertilisers, fungicides, antiparasitics and weedkillers. Convenient see-through strip to check the level of the liquid inside. Aluminium shaft and piston with adjustable ring nut to mark down the solution contained in the tank. Rear button for continuous nebulisation with locking mechanism. Safety valve for pressure above 3 bar and vent button to release the pressure and make it easier to open the container. Adjustable nozzle. Use the full 360° thanks to a handy filter with weight. Chemical-resistant Viton® seals for maximum durability.
